## AI Fairness Canvas

Scope of the project regarding biases	
<p><b>Objective:</b> Clarify what constitutes bias in the context of your AI project.</p> <p><b>Questions:</b></p> <ol style="list-style-type: none"><li>1. What is the intended purpose of your AI model?</li><li>2. Who are the end users, and how diverse are they?</li><li>3. Are there historical, cultural, or systemic factors that might influence the training data or model behavior?</li></ol>	

Data	
<p><b>Objective:</b> Ensure the training data represents diverse perspectives and minimizes bias.</p> <p><b>Questions:</b></p> <ol style="list-style-type: none"><li>1. Is the data representative of the target population?</li><li>2. Are there imbalances or gaps in the data about representing specific groups?</li><li>3. Were the data labeling processes reviewed for subjectivity or inconsistency?</li></ol>	

Model	
<p><b>Objective:</b> Train the model to reduce biases and ensure fair outcomes.</p> <ol style="list-style-type: none"><li>1. Do you use the fairness metrics in evaluation (e.g., demographic parity, equalized odds)?</li><li>2. Do you measure disparities in predictions across different demographic groups?</li></ol>	

Outputs	
<p><b>Objective:</b> Foster transparency and shared responsibility.</p> <p><b>Questions:</b></p> <ol style="list-style-type: none"><li>1. What decisions do you document regarding bias mitigation strategies?</li><li>2. Do you involve diverse teams in decision-making processes?</li><li>3. Do you provide training to developers on ethical AI practices?</li><li>4. Do you share findings with external stakeholders for feedback?</li><li>5. Do you publish bias mitigation strategies and results openly to encourage trust?</li></ol>
